

This policy is no long in effect.

On April 7, 2016, the board of directors discussed the pros and cons of this policy and different options. General consensus was that support for individual athletes was best done within the NSDP program. The board voted to rescinded the Travel Funding Policy as the board wishes to support the program rather than individuals.

Travel Funding Policy

Travel assistance will be allotted annually by the directors in accordance with policy established by the Board of Directors and budget limitations. Current policy is that the club will provide travel assistance to athletes who are club members, qualify for the BC team, and attend their national biathlon or Nordic race event. This sponsorship is meant to recognize their level of dedication, achievement, and the extra expense that such athletes often incur. The club recognizes that the race team may provide other sponsorship from their own budget. The club allotment will be divided equally between all athletes that have qualified. Funding is not available through the club for regular travel to BC cup races and snow camps.

Funding may be considered for travel to other special events that athletes have qualified for because of outstanding performance above and beyond normal racing activities. These requests for travel assistance will be handled as follows:

- Any request must be in written form only,
- The written application must include:
 - Reason for travel and description of the event
 - A detailed budget
 - Other methods of fund raising the athlete(s) have undertaken
 - Amount requested from the club

The written applications must be received in advance of when funding is required.

Authority

This policy is approved by and promulgated under the authority of the BVXCSC Board of Directors.
